# Finishing Touches in Producing a Map

An accurate map requires a title, legend, scale bar, and north arrow. You can find the scale bar and north arrow under “View”, “Decorations”.

To add the rest of the features:

1. Select “Project”, “New Print Composer”
2. In the new window, select “Layout”, “Add Map”. Then drag on the white space to create a red box. This is where your map will appear on the page.
3. Under “Layout,” you can select “Add Label” for a title and “Add Legend” for a legend. (You can also add a north arrow and scale bar in this window.

Now you are ready to export your image. Simply click “Composer,” “Export as…” to export your image.
